

## Get Accessible for Dyslexia Awareness Week.

To celebrate the launch of Dyslexia Awareness Week the British Dyslexia Association (B.D.A) is premiering a complete learning support package for its members.

The B.D.A. Learning Access Suite is the first package of its kind in the world to provide unparalleled support for reading, writing and accessibility for dyslexic people for use at home. The Suite is **less than half** the recommended retail price.

The B.D.A. Learning Access Suite contains:

- **Dragon NaturallySpeaking**, version 10, a speech recognition tool that allows the user to speak to the P.C. and see the words appear on the screen;
- **ClaroRead** text- to- speech tool, which makes text accessible by reading it to the user;
- **ScreenRuler**, a reading ruler, which highlights and magnifies a band of text, making it easier to concentrate on text or objects on the screen;
- **ClaroView** colour overlays, which changes the colour of the screen providing a clearer view;
- **MindFull**, a concept mapper, which allows users to create their own 'mind maps' through a simple program.

The B.D.A. Learning Access Suite allows B.D.A. members to purchase excellent technology worth around £350 for just **£149** plus V.A.T. Schools can also purchase the Suite for £99 plus V.A.T.

The B.D.A. Learning Access Suite is available to buy on the B.D.A. online shop [www.bdastore.org.uk](http://www.bdastore.org.uk).
